

PRESS RELEASE

Pall-Ex adds four new UK members

LEICESTER, UK: August 31, 2017. Pall-Ex continues to grow as it welcomes four new members to its UK network.

Baytree Transport, based in Berkshire, will cover locations in the RG postcode area; Denny-based XS Transport will manage parts of the FK and G postcode areas; and the Essex branch of FTS Group will operate across the IG, RM, E and N postcode areas. Also joining the network is D&S Transport, managing parts of the SW postcode; as well as Neill & Brown Global Logistics, covering the HU postcode.

Kevin Buchanan, group managing director of Pall-Ex, said: “Our UK membership is thriving and we’re thrilled that reputable hauliers are continuing to see the benefits that come with being a part of our award-winning network. Each new member adds to our capabilities, increasing efficiency within specific locations thanks to dedicated, customer-focused teams that embody our passion for innovation, progression and quality.”

A top-performing Pall-Ex member, Aaron Logistics, is also seeing its own operations grow with the opening of a brand new facility in Oxford earlier this year. After many successful years within Wrexham, the company decided to emulate the business’ success further afield.

Already showing promising results, the new location has seen steady growth throughout its first four months in operations and now delivers excellence throughout the OX and parts of the RG and NN postcodes in addition to its existing postcode areas in the CH and LL regions.

Kevin continued: “It’s an exciting time for Pall-Ex, with the addition of new members and the success of others. Every step is contributing towards our strong reputation as the network of choice across the UK and Europe.”
