

## **PRESS RELEASE**

**ISTANBUL: June 21, 2017. Turkish Cargo has begun a weekly A310 freighter service to Paris CDG.**

Automobile, aircraft and aircraft engines, as well as pharmaceutical products and plastic raw materials enjoy the top-ranking items in the export operations performed to Turkey from France, being the third-largest economy across the European Union and the sixth-largest economy of the world.

Since France has a wide range of products and market diversity, it constitutes a market with high potential for Turkish Cargo.

Turkish Cargo aims to provide a better connection service to Africa, Middle East and Turkic Republics, especially the Far East, which constitute 75 percent of its transportation potential upon initiation of the flights to Paris.

Turkish Cargo, which provides the best connections to the production and trade centers around the world, continues to develop its appealing opportunities with the understanding of utmost service quality in order to meet by the best way its customers' needs.
